

Take the WITTMANN energy challenge!

energy efficiency

We are not afraid of comparisons and pledge to take back our *SmartPower* or *EcoPower*!

When you buy a machine from our *SmartPower* or *EcoPower* series, we guarantee that you will get the most energy-efficient machine on the market. If you have a comparable machine with a better energy balance, we will take back our machine at no cost to you. To measure both machines we will provide the IMAGOxt measurement system free of charge.

If you are interested, please contact your personal WITTMANN BATTENFELD partner.

valid until 31 March 2023 within Europe

Get sustainable!

An integral part of the WITTMANN Group's corporate philosophy.

Energy efficiency has always been an issue to which we pay special attention. With the introduction of the *PowerSeries*, we have brought a range of machines to market whose energy consumption rates are setting new benchmarks for the industry.

Why energy efficiency?

- » Environmental relief and climate protection
- » Resource conservation
- » Cushioning of energy price rises
- » Reduction of CO₂ tax burden
- » Positive effect on carbon footprint
- » Eligibility for local promotion of energy saving systems
